LONG DISTANCE PHONE MONROE 7000

Our Policy

The policy of the HOOKER GLASS & PAINT CO. has evolved around the basic idea—

“Our Customers Must Prosper”

As our Customers prosper, we also prosper with them. Our success is intimately connected with theirs.

OUR FACTORY MANAGEMENT realizes the necessity to continually maintain and improve the quality of KING PRODUCTS so that our customers may know that they are giving the best service to the Public at all times. We appreciate that this quality merchandise must be manufactured efficiently, at a low cost, which will enable our Customers to give the Public greater value. We believe this is the only sure road to success for our Customers and ourselves.

OUR SALES DEPARTMENT is continually on the alert for new ideas, to discuss with both our factory and our Customers, believing that only in such co-operation lies continued success for all.

OUR ENTIRE ORGANIZATION is imbued with the conviction that Quality Products sold at prices which give our Customers a competitive advantage, with sound profits, is the only way to build for the future.

OUR EXECUTIVE OFFICERS insist on service from the entire Hooker Organization with the one particular aim—to create and hold satisfied Customers. This service includes assisting our Customers to operate soundly and profitably. We invite all paint and glass Dealers, whether they handle the King Line or not, to bring to us their business problems for solution. The HOOKER GLASS & PAINT MFG. CO. has a background of almost eighty years of experience which is always at your service.

HOOKER GLASS & PAINT MFG. CO.

Lacquers, Brushes, Painters'
Supplies, Wallpaper, Paper-
hangers' Tools, Roofing
Specialties, Window Glass,
Plate Glass, Builders' Glass,
Mirrors

Terms for Approved Credit

We are glad to extend credit to all responsible customers. If your name does not appear in the regular commercial agency books, please refer us to dealers or manufacturers from whom you have bought on credit, or have your banker or some responsible merchant in your town send us a guarantee that your bills will be promptly paid when due.

Goods will be sent C. O. D. if a cash remittance accompanies the order as a guarantee of good faith, or payment is guaranteed by a bank or responsible party.

Prices

All prices herein quoted are the market prices the day this catalog goes to press, and are subject to market changes and to change without notice.

Except when otherwise arranged, all goods are sold F. O. B. Chicago and warranted exactly as represented, and we assume the responsibility of any damage through the carelessness or neglect of our employees up to the time the goods are delivered to the express or railroad company and we have a receipt for them in good order, when our responsibility ceases, and we can allow no claim for breakage, leakage or damage. All claims for shortage or deductions must be made within five days after the receipt of goods.

King Liquid Paint

"As Good As Paint Can Be Made"

KING Liquid Paint is prepared especially for high grade exterior painting. It is composed of the most durable pigments properly combined to make a paint of maximum durability. Strictly pure linseed oil is the only oil used in King Liquid Paint. Other oils and liquids are useful for various types of paint, but we believe that pure linseed oil is the safest and best to use in exterior house paints where good appearance, perfect protection, and long life are desired.

Only the best grades of white lead, white zinc, pure colors, and other ingredients are used. The result is a paint which will endure the most severe exposure and give the best surface protection.

Made in the Following Colors and Tints

Standard 24 shade color card

- *No. 2003 Silver Gray
- No. 2004 French Gray
- *No. 2005 Light Gray

- No. 2961 Myrtle Green

* These colors also shown on standard 16 shade card.

"The Best is Always the Most Economical"

It pays to use good paint. King Liquid Paint will cover more surface per gallon than "cheap" paint. It will render better protection service and last many years longer. If you buy paint for economy, figure the cost of the job per year. On that basis a King Liquid Paint job is least expensive.

DEALERS: If you believe in quality merchandise as the best trade builder, you should sell King Liquid Paint. It will please your most particular customers. Write for our attractive Dealers' Proposition on the full "King Line."

The "Whitest" White

Recent advances in the manufacture of pigments and oils has made possible the creation of this paint. King Super White is whiter than any ordinary "outside white" paint. It has extreme covering power and produces a whiter job with fewer coats. Sell King Super White to your most particular customers and they will be greatly pleased with results.

No. 2450—King Super White Exterior

Made of the new high strength pigments combined with pure linseed oil which has been especially treated to remove the yellowing tendencies. That is why King Super White is whiter when applied, and stays white longer than ordinary outside white.

King Super White will not crack or peel on dry surfaces. It chalks very slowly and leaves the surface in excellent condition for repainting.

When your customer wants a real "white" job, recommend King Super White in preference to regular white mixed paint or hand-mixed paint. Every Super White job is a splendid advertisement for your store and will bring you other business.

Because of its pure white color, King Super White makes an excellent base for light tints such as silver gray, ivory and cream. It can be tinted with King Colors in Oil to any desired tint.

Chromic Oxide Green

Green has become a very popular trim color during the past few years, but ordinary greens do not give proper satisfaction because of their natural tendency to fade or change color when exposed to direct sun rays. King Chromic Oxide Green has been perfected to answer the demand for a permanent unfading green. It has a pleasing medium green color which makes an attractive trim for white or ivory houses. It is ideal for use on fences, flower boxes, etc. For best results it should be used full strength, but it can be combined with King Super White for producing various lighter shades of green.

Northwestern Pure Linseed Oil Paint

for All Exterior and Interior Painting

NORTHWESTERN Pure Linseed Oil Paint is one of the most popular paints in the Middle West because of its long record for durability and satisfactory service, and its popular resale price. The combination of high quality and low price makes Northwestern Paint one of the best paint "values" on the market.

There is not a drop of inferior or substitute oil in Northwestern Paint. Only pure linseed oil is used, combined with white lead, zinc and other high grade pigments, pure colors and thinners to produce an easy-working paint of good appearance and exceptional durability. The demand for this paint has made possible a volume production with resulting economies which permit the low price basis of Northwestern Paint.

Northwestern Pure Linseed Oil Paint Is a Real Business Builder

Dealers who distribute Northwestern Paint find it a great builder of good-will and volume business. People who use it usually come back for more and they frequently recommend it to their neighbors and friends. The popular price at which it can be sold meets the great demand for "good" paint at a price which all can pay.

You need never hesitate in recommending Northwestern Pure Linseed Oil Paint to your customers. It is thoroughly dependable in every way. It is lighter in weight than King Liquid Paint, but under normal conditions will give four or five years of excellent service on outside work.

The amateur painter finds Northwestern Paint very easy to apply and he can do a very creditable job with it. That is another reason for its popularity.

Passaic Mixed Paint

A PREPARED house paint of wonderful merit considering the remarkably attractive price at which it is sold. It not only looks well, but covers and wears well, is durable and works easily under the brush. No effort has been spared in selecting the materials and in manufacturing Passaic Paint to make it the LEADER IN ITS CLASS.

Many people need paint who simply cannot afford to buy first grade material. Passaic Mixed Paint is designed to meet this need. Dealers who have a demand for good paint at a low price, should offer Passaic Paint. It will get the business.

Standard 24 shade color card:

- *No. 975 Pearl
- *No. 976 Sky Blue
- *No. 977 Light Gray
- *No. 978 Apple Green
- No. 980 Terra Cotta
- *No. 982 Pink
- No. 983 Olive

- *No. 3151 Light Ivory
- *No. 3152 Silver Gray
- No. 3153 French Gray
- *No. 3154 Buff
- *No. 3155 Bungalow Brown

Also made in Inside White, No. 995 Outside White and No. 996 Black.

* These shades also shown on standard 16 shade color card.

Passaic Is Not a "Cheap" Paint

For interior work it produces results equal to many higher priced paints. Although it will not wear as long on exposed surfaces as King Liquid Paint or Northwestern Mixed Paint, it is truly a leader in its class. Many dealers sell it for both inside and outside work and they report that their customers are satisfied with its service.

Many paints selling at comparative prices are composed mainly of water "emulsion." Naturally, these paints will not give good service anywhere. When used outside they frequently wash off in several weeks. Passaic Paint will give adequate service on inside or outside job.

When used according to directions one gallon will cover between 250 and 300 square feet, two coats to the gallon.

Roman Flat Wall Paint (Flowing Type)

The new flowing type of Roman Flat Wall Paint represents the most recent advance in the development of fine wall finishes. By the use of specially treated oil and high-strength pigments we have succeeded in producing a free-flowing paint with maximum spreading capacity and high opacity or covering power. This paint is easy to apply and is self-leveling so that all brush marks are eliminated and the resulting finish has a high degree of washability. It will not harden in the can.

Roman Flat Paint has been known to cover over 800 square feet to the gallon on a painted surface. Its remarkable hiding power makes one coat jobs possible on painted walls. On unpainted plaster walls we recommend the addition of 50% Eluva Surfacers for the first coat (see page 18) which provides a suitable foundation for the second and final coat of Roman Flat Wall Paint. For finishing the various patented wall materials and insulating boards, please write for special instructions.

Made in pure white and the following tints:

No. 358	Pea Green	No. 1384	Dark Tan
No. 362	Buff	No. 1385	Silver Gray
No. 372	Nile Green	No. 1491	French Gray

⅛-Gallon Cans (white only), each	.64

Eureka Flat Wall Paint

A practical flat wall finish of the new flowing type offered as a fitting companion to Northwestern Pure Linseed Oil House Paint. Eureka Flat Paint produces a beautiful finish without gloss and with a high degree of washability. It is very easy to apply and has excellent covering capacity.

For interior walls and ceilings of plaster, wood or metal, you will find this an excellent finish. For unpainted plaster walls, add 50% Eluva Surfacers to the first coat. For unpainted metal ceilings, thin first coat with turpentine or naphtha. Eureka Flat Paint is an excellent finish for oil-opaque or water color window shades when thinned with turpentine to the proper consistency.

Made in the following colors:

No. 4021	White	No. 4135	Nile Green
No. 4101	Silver Gray	No. 4136	Sky Blue

Meridian Mixed Paint

A low priced paint especially designed to aid our dealers who are faced with "cheap" paint competition. This type of paint is not usually used on outside jobs, but gives excellent satisfaction for the money when used on interior work. It has a glossy finish, but not as high gloss as the better grades of house paint. Meridian Mixed Paint is the best paint on the market for the price.

Made in the following shades:

No. 695 White	No. 652 Silver Gray
No. 651 Light Ivory	No. 675 Pearl Gray
No. 670 Cream	No. 677 Light Gray

Shuron Liquid Floor Covering

Made in following colors:

No. 1100 Sandstone
No. 1101 Navy Gray
No. 1102 Mellow Tan
No. 1103 Garnet Red
No. 1107 Slate
No. 1109 Tile Green
No. 1110 White
No. 1111 Black
No. 2775 Light Brown
No. 2785 Natural Gray

A remarkable product for protecting and beautifying exterior and interior floors of all kinds. It is a tremendous improvement over all former types of finish such as porch and deck paints, cement coatings and floor enamels.

Shuron Liquid Floor Covering dries in four hours with a tough, waterproof, glossy finish. It is weatherproof, waterproof, oil-proof and wearproof, and when used on concrete surfaces, it prevents "dusting" on the surface.

Use "Shuron" on porches and stairs. It will give the wood perfect protection and improve its appearance. Use "Shuron" on cement floors, walls and stairs (see special directions below). Use "Shuron" for enameling interior soft wood floors and wood-work. Use "Shuron" for refinishing

ing battleship linoleum flooring. Use it wherever you want wearing qualities plus weathering qualities and beautiful finish.

Painting Concrete or Cement

Cement or concrete often contain free lime. This is liable to destroy any paint or enamel applied to its surface. Before painting a cement floor or wall, as an insurance against trouble, apply a solution made with three pounds of zinc sulphate crystals in a gallon of water; this will neutralize the lime, bind the dust, and seal the pores of the cement or concrete. Then proceed to apply **King Concrete Filler and Sealer** and **Shuron Liquid Floor Covering** according to directions on cans.

CAUTION

Patent floor hardeners or waterproofing compounds are frequently mixed with concrete. These agents are inimical to paint adhesion and we will not be responsible for failure if used on such surfaces.

Northwestern Floor Enamel

For Interior Floors and Trim

This enamel is designed for general interior use on surfaces that must withstand considerable wear. It is suitable for floors, stairs and woodwork in homes, and for bins, work benches and shelves in stores and factories.

Northwestern Floor Enamel dries overnight with a fine glossy finish and resists wear and water. Made in eight attractive colors. Floors finished with this enamel are easy to keep clean and an aid to sanitation.

Made in the following colors:

No. 800 Golden Ochre	No. 2802 Medium Yellow
No. 801 Maroon	No. 2803 Dark Ivory
No. 806 Old Gold	No. 2804 Light Dust Color
No. 810 Light Gray	No. 2955 Golden Brown

King Concrete Filler and Sealer— No. 2593 Clear

This product is designed especially for preparing concrete and cement surfaces before finishing with "Shuron" or other finishes. It is insoluble in water and has great resistance to the action of alkali. When used as a primer on unpainted cement it seals the pores and provides a perfect foundation for the finishing coat, insuring good adhesion and reducing the quantity of paint needed for the finishing coat. Your job will look better and wear longer if you use King Concrete Filler and Sealer for a primer.

SOF-GLOW

"The Perfect Satin Wall Finish"

Made in the following
ing Pastel Colors:

No. 2700 White
No. 2701 Ivory
No. 2702 Cream
No. 2703 Tropic Gray
No. 2704 Opal Green
No. 2705 Warm Tan
No. 2706 Abbey Brown
No. 2707 Rose Tint
No. 2708 Soft Gray
No. 2709 Roco Blue
No. 2710 Buff Tan
No. 2711 Silk Green
No. 2712 Voile Green

SOF-GLOW produces the beautiful modern satin finish so popular for walls, ceilings and woodwork in kitchens and bathrooms. It has an extraordinary degree of hiding power. It is also the ideal wall finish for use in hotels, hospitals, office buildings and public institutions because of its extreme durability and washability. One coat will usually suffice unless the surface is in poor condition. Decorators tell us they have never before seen a paint which works so easily and covers so solidly as SOF-GLOW.

It works equally well on wood, metal, plaster or concrete surfaces. Dries with a hard, semi-gloss surface which will tone down to a satin finish after a few days.

Walls painted with SOF-GLOW may be frequently washed with soap and water without injury to color or finish. It is easier to wash than either flat paint or enamel.

King Stipple Flat Paint—No. 6150 White

Experienced decorators frequently require a high grade flat paint which can be stippled after application. No. 6150 is especially designed for this purpose. It is heavy-bodied and can be thinned, if necessary, with turpentine or naphtha. It is made for brush application and brush stippling. Makes a perfect foundation for high grade Tiffany or Mottled effects.

5-gal. Cans. Per Gal.....	\$4.12
1-gal. Cans (4 to case). Per Gal.....	4.22

Northwestern Interior Gloss

Here is an ideal finish for walls and woodwork where a gloss finish is desired at a minimum cost. **Northwestern Interior Gloss** is an enamel-paint that works with the ease of paint and produces a gloss finish like enamel. Covers solidly in one coat over a properly prepared surface. Flows out nicely covering all brush marks.

Northwestern Interior Gloss is a splendid finish for use on kitchen walls and ceilings, laundries, bathrooms, etc. When used on an unpainted wall or a dark surface, we recommend the use of King or Northwestern Enamel Undercoat as a foundation for the finishing coat of Northwestern Interior Gloss. Such a treatment insures good results at low cost.

Every dealer can find a profitable place for this product in his stock. It can be sold for all interior purposes where a gloss finish is desired and will please your painter and retail customers equally well.

King Eggshell Stipple Paint No. 780 White

Many large buildings and institutions prefer a plain stipple effect with a semi-gloss finish. This cannot be obtained with the regular flowing-type materials. It is also difficult to gloss up a stippling flat paint for this purpose and secure a uniform finish. We have prepared **No. 780** for this type of work. It is heavy-bodied and must usually be thinned with turpentine or naphtha before applying. It enables the decorator to produce very beautiful effects.

Lyk-A-Lak Enamels

The Lyk-A-Lak color card shows 22 beautiful enamel colors suitable for many uses. There are six special Auto Colors for refinishing motor cars and trucks. Lyk-A-Lak produces attractive results and will give satisfactory service on such exposed surfaces. There are also sixteen beautiful colors and tints for finishing furniture, woodwork, walls and floors. Anyone can use Lyk-A-Lak successfully and the most inexperienced people frequently get perfect results. That is one reason for its growing popularity. Lyk-A-Lak is self-leveling and does not show brush marks. It is elastic and will stand hard usage. It covers well, and one or two coats will give perfect results on any smooth and clean surface.

Wood Finishes

For refinishing furniture or woodwork in the natural grain, we offer four popular transparent colors and clear Lyk-A-Lak. These enable the user to retain or change the color without removing the old varnish or without hiding the grain. For producing a grained effect on painted surfaces, use No. 2367 Ground Color, apply Lyk-A-Lak Graining Compound and grain with comb or brush. When dry, apply Lyk-A-Lak Varnish Stain or clear varnish.

Lyk-A-Lak Specialties

No. 874 Auto Top Dressing is especially prepared for protecting and renewing black auto tops of pantasote or similar materials. It fills the pores of the materials, stops small leaks and protects the surface from the most severe weather conditions.

No. 595 Gold and No. 590 Silver Lyk-A-Lak are designed for decorative purposes on metal radiators, ornamental iron work, picture frames, furniture, etc. Put up in handy double compartment cans.

King Amsterdam Enamel

For Exterior and Interior Use

King Amsterdam Enamel is the most durable type of white enamel for the very highest grade of exterior or interior work. It is made of the very best materials by the "old Dutch" method from properly aged white base stock. This insures an extra smooth enamel of brilliant gloss and beautiful depth of finish comparable to the finest imported enamels. This type of enamel dries dust-free over night, but takes several days to harden. When applied on unpainted or dark surfaces, we recommend one or two coats of King White Enamel Undercoat.

For outside use on colonial pillars, store fronts, etc., use Amsterdam Enamel for greatest beauty and durability.

Made in following finishes:

No. 2060 White Gloss	No. 3378 White Satin Finish
No. 3405 Ivory Gloss	No. 3743 Ivory Satin Finish

⅙-Gallon Cans (48 to case).	Each.....	.72

King Enamel Undercoat No. 2531 White

King Enamel Undercoat is the perfect foundation coat for all kinds of enamel. It covers solidly in one coat, dries hard in four hours with a smooth, hard finish which prevents "flatting" or "spotting" of enamel coats. King Enamel Undercoat is ground so thoroughly and finely that it seldom requires sanding. On unpainted or dark surfaces, one or two coats of this Undercoat will provide a perfect base for the enamel coats and insure a fine, brilliant finish. When used under tinted enamels it may be tinted to match with King Colors in Oil.

King Kitsheen Enamel

The Ideal Interior Wall Enamel

King Kitsheen Enamel is a full gloss, heavy-bodied enamel for interior walls, ceilings and woodwork. It produces a finish of remarkable smoothness, beauty and washability.

Kitsheen is ideal for walls and other large surfaces because of its easy-working and free-flowing qualities. It levels out perfectly without showing brush marks or laps.

Kitsheen produces a hard surface with a beautiful lustre. This surface does not pick up dust or dirt and it is very easy to keep clean. It can be washed repeatedly without injury to color or finish.

Sell Kitsheen to your best customers for high-grade wall work and you will be sure to please them.

King Mill Whites

Industrial plants, factories, warehouses, bakeries, laundries and creameries have learned of the many advantages of Mill White for interior walls and ceilings. It increases the effect of natural daylight and reduces the cost of artificial lighting. It assists in maintaining cleanliness and sanitation. We offer King Mill White in several popular finishes as follows:

No. 1471—Gloss King Mill White

A high-gloss, enamel-like finish which dries in 12 to 24 hours. Has excellent hiding power and is easy to apply by brushing or spraying. Can be washed repeatedly without injury to color or finish. When applied to a properly prepared surface, it will not crack, peel or flake off. The ideal finish for food plants, candy factories, dairies, laundries, creameries and hospitals.

Northwestern Mill Whites

For industrial jobs where good results are desired at a very moderate cost, we have developed Northwestern Mill White in several finishes. It is less expensive than King Mill White, but is lighter in weight. It will give excellent service and will produce better and more permanent results than the ordinary water paints, commonly used for this purpose.

No. 2542—Gloss Northwestern Mill White

An oil paint with a high gloss finish for interior walls, ceilings and woodwork. Dries hard in 12 to 24 hours with a washable finish. Can be applied by means of brush or spray gun. Northwestern Mill White has good covering power and spreading capacity. It provides a permanent finish which will not peel or flake if properly applied. Can be tinted to any desired shade by adding King Colors in Oil.

Eluva Good Surfacers

Eluva Good Surfacers is a good sealer or surfacer that will stop suction, kill hot spots and do the many things that a real surfacer should do to prepare a surface for good work.

It can be used on old-fashioned lime plaster, new patent plaster and on pulp and other types of wall board. It will kill water stains, even when a leaky roof has caused asphaltum or creosote to be present

in the water and stain ceilings or walls.

It is not affected by the flattening oils or driers in flat paints or by temperature or humidity conditions. It is waterproof and acid proof. It will not sag, peel, chip or blister; neither will it curdle and it does not leather over when the can is left open for a short period.

5-Gallon Cans. Per Gallon.....	\$2.88
1-Gallon Cans (4 to case). Each.....	3.00
½-Gallon Cans (6 to case). Each.....	1.66
¼-Gallon Cans (12 to case). Each.....	.94
⅛-Gallon Cans (12 to case). Each.....	.54

King Wall Primer—No. 2480 White

King Wall Primer is put out to meet the present day plaster conditions as well as the demand for two-coat work. It will seal fire cracks, and stop suction much better than the old-fashioned white lead and boiled oil would, and will enable the painter to get a satisfactory two-coat job of wall painting.

King Wall Primer is a combination sealer and paint coat. It has exceptionally good hiding properties and is very elastic and has the ability to adhere better than the ordinary oil and varnish primer. It makes ideal foundation for succeeding coats.

King Wall Primer brushes easily and covers from 700 to 800 square feet one coat, on smooth plaster surfaces. It is free flowing, self-leveling, leaves no laps, brush marks, or other mechanical defects.

Repaint Work—King Wall Primer may be used to advantage in the first coat on old painted walls. For this coat, under ordinary conditions, one or two quarts of primer should be mixed with each gallon of Flat or Gloss Paint. Where the fire cracks are extremely bad, use straight KING WALL PRIMER for first coat.

Barrels and Half-Barrels. Per Gallon.....	\$4.04
5-Gallon Cans. Per Gallon.....	4.12
1-Gallon Cans (4 to case). Each.....	4.22

King Publico Building Paint— No. 4300 White

(Semi-Paste)

This paint is made especially for walls of public buildings, hospitals, theatres, schools, etc. It produces a beautiful glossy finish which dries with a very hard surface, impervious to water and other stains. It has a very high degree of washability. Can be tinted to any desired shade by adding King Colors in Oil.

No size coat is necessary with Publico, for it is a paint and sealer combined. For first or foundation coat over plaster reduce 1 gallon of Publico Building Paint with 2 gallons Publico Thinner. For second or finish coat reduce 1 gallon Publico Building Paint with 1 gallon Publico Thinner.

Barrels and Half-Barrels. Per Gallon.....	\$3.82
5-Gallon Cans. Per Gallon.....	3.88
1-Gallon Cans. Per Gallon.....	4.00

Publico Thinner—No. 4301

5-Gallon Cans. Per Gallon.....	2.88
1-Gallon Cans. Per Gallon.....	3.00

Condensary First Coater No. 4880 White

Produced to meet exacting conditions in bakeries, laundries, pasteurizing plants, etc., where moisture and humidity prevail. This formula was developed as a first coater for plaster, concrete and cement surfaces. Made in consistency ready for application. It dries hard over night with a tough, elastic and durable film; stops suction, sealing the surface thoroughly; can be applied directly to plaster, concrete, etc., but where there is any indication of free lime on a new plaster wall, we recommend the use of King Concrete Sealer first.

Condensary First Coater can be tinted to any desired shade. If thinning is necessary use turpentine or turpentine substitute only.

Master Painters' Semi-Paste Paint No. 5434—White

This is an extremely popular paint with Master Painters. It is made on the popular 40-40-20 formula of Lead, Zinc and Lithopone, ground to a semi-paste consistency in pure Linseed Oil and

Japan Drier. It can be reduced with Linseed Oil and Turpentine to meet surface conditions. It can be tinted to any shade with King Colors in Oil.

It is mixed and used on the basis of one gallon of Boiled Oil to one gallon of the paint, although the experienced painter will vary these quantities to meet the requirements of his work.

King Glazing Liquid No. 5394-B

A colorless blending liquid for use over flat wall paint or texture paint. It acts as a medium for carrying colors used to produce Tiffany or Mottled effects.

King Glazing Liquid sets slowly and dries to an eggshell gloss and has no tendency to run when walls are stippled. Can be applied with an ordinary paint brush and where more than one coat is necessary allow 24 hours between coats. The texture of the different effects is produced by stippling the glaze coat with crumpled cloth or paper held loosely in the hand.

King Barn Paint (Ready-Mixed)

Made in the following colors:

"B" Light Gray

"F" Bright Red

"J" Prince's Mineral
(Brown)

No. 2524—Big 4 Yellow

The highest grade paint for barns, fences, bridges, sheds, silos, grain elevators, metal roofs, sheet iron buildings and warehouses, or general structural iron work where maximum durability at minimum cost is desired.

King Barn Paints are made from the most permanent and durable oxide pigments ground in pure linseed oil in ready-mixed form. They can be applied by means of brush or spray machine. King Barn Paints possess great hiding power and durability. They will preserve wood surfaces and protect metal surfaces. Excellent for painting metal roofs, gutters and rain pipes.

A Tremendous Market

There is a large untouched market for Barn Paint in the Middle West. Thousands of farm buildings are suffering for lack of paint. They are quickly deteriorating and unless protection is soon given them, they will require extensive and costly repairs. As soon as the agricultural markets are more favorable to the farmer; these buildings must be painted. Every dealer should make a thorough canvas of his county and go after this business. You can safely recommend King Barn Paints to give maximum protection at the least cost.

No. 2765—King Metallic Zinc Paint

The American Zinc Institute's Research Laboratory has developed this paint for protecting galvanized sheets and sheet metal. It is made of Zinc Oxide and Zinc Dust combined with pure linseed oil. Metallic Zinc Paint produces a film of perfect protection which prevents rust and deterioration of galvanized iron. Ideal for galvanized roofs and buildings. One gallon will cover about 860 square feet of surface so the cost per square foot is low. Write for interesting descriptive booklet.

5-Gallon Cans, per gal.	\$7.66
1-Gallon Cans (4 to case), each	7.78

Northwestern Semi-Paste Barn Paint

Many buyers prefer a barn paint in semi-paste form to be reduced with boiled linseed oil.

Northwestern Semi-Paste Barn Paint when so reduced makes a pure linseed oil paint of great durability. It produces a tough, durable film with a high gloss, which resists weather. For first coat on new wood reduce with one-half gallon boiled oil and one-half gallon turpentine to each gallon of paint. For first coat on old wood that is well dried out, add one gallon of boiled oil to each gallon of paint. For second coat add one-half gallon of boiled oil to each gallon of paint. This brings down the cost of the paint to a very nominal figure.

Made in three colors: No. 556 Bright Red, No. 557 Light Gray and No. 5298 White.

No. 556 Bright Red No. 557 and No. 5298

Hooker Glass & Paint Mfg., Co.

PLATE GLASS—WINDOW GLASS—ROUGH GLASS—MIRRORS
Makers of KING PAINT & VARNISH PRODUCTS

King Machine and Engine Enamel

A glossy, attractive and durable finish on a piece of machinery will increase its salability far beyond the slight increase in the cost of finishing the machine. The cost of paint on an average machine is only a few cents. When using the best possible finish, the additional cost per machine is hardly noticeable. The difference in appearance is apparent at a glance and often makes sales easier.

King Machine and Engine Enamel is made of high grade durable varnish and permanent colors. It dries with a full gloss and is not injured by oil or water. Protects metal and wood from rust and deterioration. Dries over night and has a fair degree of heat resistance. Suitable for engines, motors and machines of all kinds. Send for color card.

No. 492—Ajax Iron Filler

The appearance of the finishing coat depends largely upon the condition of the surface. Iron castings are usually rough and full of small holes. A smooth finish on castings is impossible unless the surface is properly prepared.

Hooker's Ajax Iron Filler is designed for this purpose. It is a paste filler which is thinned with Turpentine and Benzine to the consistency of cream. It fills up the inequalities in the metal, dries unusually hard and provides a perfect bond between the metal and the finishing coats. Neutral in color and can be used with any color of paint or enamel.

Per 100 lbs.	
800-lb. bbls.	\$13.34

No. 5754—Adamant Semi-Paste Iron Filler

In order to properly prepare rough metal surfaces, they should be given a first coat of Adamant Semi-Paste Iron Filler. It comes in semi-paste form and should be thinned with turpentine or benzine to the consistency of thick cream and a heavy coat applied with a brush. When thoroughly dry, sandpaper smooth, and the surface is ready for finishing.

Quick-Drying Machinery Paint

Where a quick drying, hard finish is desired on machinery, engines, etc., our Quick-Drying Machinery Paint is the best to use. It is made in a wide variety of colors and gives perfect protection to metal and wooden parts alike.

The Flat Blue Slate shade is very popular because it does not show stains or handling marks readily. All other shades dry with a full-oil-gloss which gives the machines an attractive appearance.

Quick-Drying Machinery Paint is waterproof and oil-proof. The colors are bright and attractive although it does not produce as high grade a finish as our Machine and Engine Enamel. For work which requires a fast and low-priced finish the paints cannot be equalled.

King Paste Wood Filler

In order to produce a perfect varnish finish on open-grained hardwoods, such as oak, ash, etc., the wood must first be filled with a good paste filler. King Paste Filler is especially designed for this purpose, is reduced with turpentine or benzine, applied with a brush, and after it sets, the surplus filler is wiped off with waste or excelsior. It dries hard as flint and sands easily. Fills the pores of the wood and brings out the natural beauty of the grain to perfection. Made in the following shades:

606 Natural Oak (Light)	610 Light Golden Oak
608 Antique Oak (Dark)	611 Dark Golden Oak
607 Mahogany (Red)	617 Ebony (Black)

Magic Paint and Varnish Remover

Contains No Acids, Fusel Oil, Alkali or Water
Is Free From Offensive Odor

Licensed under U. S. Patent No. 714880

A few years ago manufacturers of Varnish Remover were all striving to produce better removers, but today price, not quality, seems to be the goal.

Varnish Removers are being made in basements, garages, barns or any place by so-called manufacturers who do not understand the theory of solvents, and are satisfied to use a combination of liquids which act after a fashion.

This condition has brought an important paint product into considerable disrepute.

Dealers and consumers are cautioned against using removers which are not

licensed and made upon proven formula.

MAGIC has been on the market for many years and is one of the oldest and most reliable obtainable anywhere.

Why take chances of spoiling your work by using inferior Removers?

Ask for Magic
It works like Magic
It sells like Magic

Meridian Paint and Varnish Remover

A low priced liquid remover for stripping off old paint or varnish coats. Does not work as quickly as "Magic" but does excellent work and is very economical.

Meridian Varnish Remover enables our dealers to meet the competition of "cheap" removers (which are very inefficient) with this product which will give satisfactory results in spite of its low price.

KING STAIN REMOVER—See Page 47

Bull Dog Dry Paste

Never Lets Go

BULLDOG is a powder, which by stirring into cold water is instantly changed into beautiful white, adhesive paste, perfectly balanced for hanging wall-paper. It holds the paper permanently, cannot spot or stain, and dries in just the right time to allow sliding the paper.

The new cloth bags printed in red and blue make a very convenient package for retail sales.

No. 2669—King Glaze-On Liquid Wax (Self-polishing)

The very latest development in floor-polishing materials. Requires no rubbing or polishing. Simply apply to a clean surface with a mop or applicator and allow it to dry. In 15 to 20 minutes your floor has a beautiful polish and is ready to use.

"Glaze-On" is especially fine for finishing rubber-tile, inlaid linoleum, or mastic floors, as well as regular hardwood floors or linoleum. It is

not as slippery under foot as the old style oil waxes.

Caution! Before applying "Glaze-On" be sure that the floor is free from all oily wax or floor polish.

Less Quantity. Per Lb.	.82

T. N. Orange Shellac Gum—A dark grade of orange shellac which makes a serviceable finish where the color is not important.

Original Bags (about 164 lbs.). Per Lb.	\$0.66
100-lb. Lots. Per Lb.	.70
Less Quantity. Per Lb.	.72

Note: Above prices on Shellac Gums are subject to frequent market changes. Our customers always receive the benefit of our best current prices on Shellac Varnishes and Shellac Gums.

King Pure Orange Shellac

A high grade, heavy-bodied shellac varnish with a clean, bright orange color. Made of best grade pure gum shellac dissolved in special denatured alcohol, 4 lbs. to the gallon. Contains no other ingredients whatever.

Where a golden finish is desired on furniture, woodwork or other surfaces, we recommend King Pure Orange Shellac. For further reducing this material, we recommend "Solox" alcohol.

King Shellac is packed in 1-gallon and ½-gallon lithographed cans, and smaller sizes in attractive bottles which make a handsome display.

Hooker's Cabinet Cement or Shellac Sticks

Furniture manufacturers and dealers, and cabinet makers find these cements a necessity. They fill deep holes and scratches and enable the finisher to repair these mars so they cannot be discovered. They are melted in a candle flame or gas jet and applied to the scratch with a hot knife or spatula. When hard, the surplus cement is sanded off and the surface is then ready for its finishing coats. A wide range of transparent and solid colors is offered so the finisher can match almost any finish. Packed one dozen sticks in a box. Made in following colors:

No.	No.
AA—Very Light Transparent	9 —Ebony or Black
1A—Regular Transparent	10 —White

This is a high grade, elastic, full bodied, black, gloss Japan. It sets dustfree in two hours and air dries hard over night.

5-gal. Cans, Per Gal.....	\$2.88
1-gal. Cans (6 to case), each.....	3.00

KING HEAT-PROOF BLACK ENAMEL (See Page 22).

King Spirit Varnish and Spirit Lacquers

A high grade line of quick drying lacquers for wood or metal surfaces. French Spirit Varnish is used for retouching and polishing furniture. Silver White and Transparent Brass Lacquer are used to preserve the lustre on brass, nickel, silver, etc. The gold and colored Lacquers are used to finish steel, tin, etc. Gloss Black Lacquer is jet black in color and is used to protect automobile lamps, windshield frames, etc. Special thinners must be used when it is necessary to reduce the various lacquers as ordinary thinners like Benzine or Alcohol will not act properly. Prices on request.

King Wall Finish

The Supreme Hot-Water Kalsomine

Kalsomine is one of the most important items in your paint stock. A good kalsomine is a drawing card because it pleases your customers and brings them back for more. People buy exterior paint for surface on the average of only once in 5 years, interior paint once in two or three years; but kalsomine is usually applied every year or twice a year.

"King Wall Finish" will absorb 15% more water than ordinary kalsomine. This means a smooth and easy-flowing mixture which sets up more slowly and prevents laps. For this reason, it is especially appreciated by employing decorators because their men can do better work in quicker time.

"King Wall Finish" is made in Pure White, Tinting White and 20 beautiful tints.

SEND FOR COLOR CARD AND DIRECTIONS FOR USING.

Cold Water Paints and Sprays

King Ideal Cold Water Paint

Fireproof and Sanitary

Cold Water Paints are especially suitable for use in factories, mills, etc., because of their cheapness, and fire-retarding qualities. King Ideal is the best grade of cold water paint. It comes in powder form and is easily prepared by mixing in cold water. It can be applied

with a hand-power or motor-power spray machine or equal results can be secured by brushing. Anyone can apply it by following the simple directions below. King Ideal Cold Water Paint will adhere to brick, wood, stone, concrete or metal surfaces long after lime or whitewash has flaked off. Made in White only, for interior use.

DIRECTIONS—One pound of Cold Water Paint covers about 50 square feet. Mix 5 pounds of paint to one gallon of water, first stirring in enough water to make a thick paste, allowing this to stand about 15 minutes and then thinning down with more water for use; always strain the paint before painting. Apply with a rubberset kalsomine or wall brush, or with a spray machine.

	No. 6354 Outside White	No. 2876 Inside White
Barrels, 400 lbs., per 100 lbs.	\$12.78	\$ 8.34

Spraying Machines for Cold Water Paint, Etc.

The Monarch Spray Machine

This machine is particularly adapted for the applying of cold water paints, whitewash, etc., to the interior of factory buildings, warehouses, etc. It is especially recommended where the work necessitates getting in and about aisles and passage ways. The portability of this machine eliminates the use of long lengths of spray hose and is especially easy to handle. Tank has capacity of 20 gallons in which is securely mounted an all brass specially mounted pump fitted out with pressure gauge. The truck is of heavy iron construction, having 6 in. wheels with 2 in. face tires. Machine complete ready for work, each.....\$84.40

The Empire Spray Machine

This machine is designed for use in connection with a barrel or other receptacle for containing the spray solution. It is furnished complete with all accessories ready for work, including 10 feet of 1/2 inch discharge hose, spray pipe, shut off valve and nozzle together with painters' sieve for straining the spray solution.

Price, complete,
each\$64.40

The Atlantic Spray Machine

This machine is especially recommended for those having a small amount of spray painting to perform continuously or at short intervals. It is particularly adapted for use about the residence, dairy, poultry yards as well as for the spraying of basements, courts, barns, chicken coops, etc. In fact, it can be used for unlimited applications. Machine furnished complete with 10 feet of 3/8 inch spray hose, shut off valve and nozzle ready for work.

Price, complete, each.....\$26.12

Brushes for Applying Cold Water Paint

We recommend our line of Kalsomine Brushes (set in rubber) for use in applying Cold Water Paints. The water solution will not loosen the bristles. See Pages 75 and 76.

King Caulking Compound

THE PERMANENT WEATHER-PROOFER

King Caulking Compound is an ideal compound for sealing all cracks, crevices and openings around doors, window frames, concrete foundations, stairs, walks, etc. To keep the cold out, the heat in, and save fuel. Keeps out dust and prevents dirt streaks on interior walls.

King Caulking Compound remains in a plastic condition indefinitely and adheres permanently to wood, brick, stone, concrete, tile or glass. A protective film forms on the surface of the seal which can be painted without staining the paint.

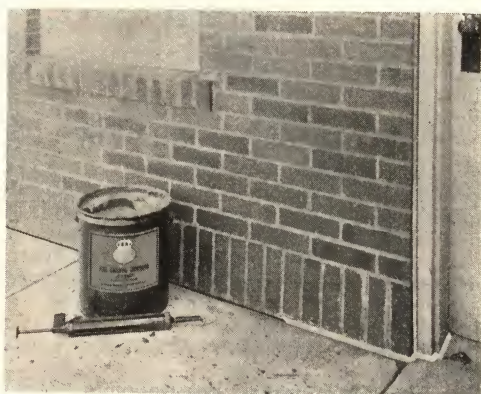

The "gun type" is recommended for caulking and sealing window and door frames, expansion joints in concrete walks, and any opening where air or water may enter the building. Also used for bedding glass in masonry or for setting glass in greenhouses and hotbeds.

The "knife type" is used for sealing metal flashings around dormers, stand-pipes, chimneys, etc., or for setting roof tiles.

Where Should Caulking Compound Be Used?

King Caulking Compound should be used on a building wherever two different materials meet, such as stone, brick, concrete, wood and metal. Each of the above materials has a different rate of expansion and contraction, causing expansion cracks which admit moisture and air. King Caulking Compound seals these openings and acts as an elastic binder between the two materials. (See illustrations.) Frame buildings should be calked wherever shrinkage has occurred between the various structural units. Colonial pillars should be carefully caulked around the base to prevent the entrance of water which ascends through the wood and causes the paint to blister and peel. If the paint on your house is peeling, it is clear evidence that moisture is getting into the wood and proper caulking will prevent this.

Contractors can develop a fine business in caulking. Detailed information will gladly be given on request.

King Kettle Boiled Linseed Oil

An absolutely pure, honestly boiled and thoroughly clarified linseed oil. Linseed oil is the life of paint and upon its purity, body and elasticity depends the permanency of the paint. There is none better than the King Kettle Boiled Linseed Oil. Write for market prices.

King Clarified Raw Linseed Oil

Every Drop Guaranteed Pure
Write for Market Prices

King Pure Gum Spirits of Turpentine

Turpentine is one of the most necessary materials in the paint industry. There are many grades of Turpentine on the market, but the best is always the safest to use. Send for price card quoting current prices.

"Starine" Crystal Spirits

A good reliable thinner for use in paint or varnish. White in color and evaporates entirely without residue. Clean and sweet in color. Mixes easily without causing clouding or separation of any kind.

London Re-enforcing Oil

A specially prepared vehicle for general painting purposes. It is made on a China Wood Oil base, which is the most complete oxidizing oil known to science. London Re-enforcing Oil is more water-proof, dries firmer and with a better gloss than linseed oil. In addition to this it is alkali-proof, steam-proof, vapor-proof and oil-resisting. It is not offered as an experiment because similar products have withstood the use of actual service for years.

London Re-enforcing Oil is recommended for exterior work. Incorporated with proper pigments, London Re-enforcing Oil makes an ideal rust inhibitive paint vehicle for fire escapes, iron fences, structural work, metal furniture, etc. When added to dark colored paints, it assists the drying and hardening.

Interior Work—As a reducer for gloss or flat paints, it adds to their durability, makes them washable and more easily applied. Unsurpassed as a wall sizing under gloss or flat paints. It is steam and vapor-proof. Excellent for brick or concrete surfaces, as it thoroughly waterproofs them.

Floors—Can be used on any type of flooring. It will not darken the wood or bruise white, but dries with a hard, tough elastic surface. Two coats give a good gloss finish. London Re-enforcing Oil makes inside or outside floor paints dry hard with a high gloss.

Structural Work—It can be blended with raw oil. Insures a lustrous, hard-drying finish on cold work or in a damp place. Adapted for work to be exposed or enclosed with concrete.

Water-Proofing Concrete or Brick—London Re-enforcing Oil absolutely stops moisture and prevents disintegration and dusting. These characteristics make it a most superior dressing for garage or concrete floors and walls.

"Dustfree" Floor Oil

This is a combination of prepared oils and special wax, producing a compound oil which, used on floors, accomplishes results which are truly wonderful. All dust deposited upon it becomes lifeless—too heavy to float in the air, while it does not adhere to the floor, and is removed readily with a stiff broom. The surface is not sticky or greasy.

Makers of KING PAINT & VARNISH PRODUCTS

Super Pyro "200" Anti-Freeze

Super Pyro "200" is the most concentrated anti-freeze of any on the market. Ordinary denatured alcohol is 188 proof—that means 94% alcohol. Not Super Pyro. Super Pyro is all anti-freeze—200 test—100% alcohol!

Super Pyro contains a special soluble oil that reduces evaporation. With the pump operating, the oil and the alcohol circulate together. When the engine stops the oil rises and forms a film. This film reduces evaporation. A simple, efficient

method—another Super Pyro advantage to tell your customers about.

BARRELED SUNLIGHT

We are exclusive distributors in Chicago of "Barreled Sunlight," the most famous white paint in the world. "Barreled Sunlight" is used in vast quantities by industrial concerns for the interior of their plants. Its pure white, lustrous finish reflects a maximum of light, it stays clean and can be washed repeatedly. It is a permanent finish of true economy.

"Barreled Sunlight Interior Enamel" is also put up in cans for household use. It produces a finish equal in color and gloss to the highest priced enamel. It is much easier to apply than enamel and requires fewer coats because of its greater opacity. A popular finish for interior walls, woodwork, ceilings, furniture, etc. Should not be used outside.

"Barreled Sunlight Interior Enamel" is also made in "Quick-Drying Form" for those jobs where speed in drying is essential. We stock all sizes of "Quick-Drying Barreled Sunlight" from 5-gallon cans to 1/16-gallon cans. If this type is wanted, please specify "Quick-Drying" or the regular form will be sent. Both forms of "Barreled Sunlight Interior Enamel" are the same price.

	Interior Gloss Enamel	Flat and Eggshell
Barrels with agitator, per gal.	\$6.12	\$5.56

Tinting Colors for "Barreled Sunlight"

To meet the great demand for "Barreled Sunlight" in tints, we offer a line of 8 colors in handy tubes. The colors are semi-liquid and mix easily without reducing. As follows: Lamp Black, Prussian Blue, Venetian Red, Orange Yellow, Burnt Umber, Chrome Green and Raw Sienna.

Small size, per doz.	\$1.66
Large size, per doz.	3.34

Barreled Sunlight Undercoat and Granolith

"Barreled Sunlight Undercoat" is the best foundation coat for a Barreled Sunlight finish on wood, metal or plaster surfaces. It is far superior to ordinary paints for this purpose because it dries with a flat, non-porous finish. All sized packages from barrels to half pints.

"Barreled Sunlight Granolith" is the special undercoat for Barreled Sunlight to be used on brick, concrete, cement or stone surfaces. In barrels, 1/2 barrels and 5-gallon cans only.

Makers of KING PAINT & VARNISH PRODUCTS

Exclusive Distributors of Barreled Sunlight

Outside Barreled Sunlight

The many dealers who have built up a nice business with Interior Barreled Sunlight can now duplicate their success—and profits—with **Outside Barreled Sunlight**.

Produced at the request of paint users everywhere, this new product is in every way worthy of the name it bears. Hundreds of formulas were developed and tested before we were willing to offer this exterior paint under the Barreled Sunlight label. The desired high quality was finally achieved by a special adaptation of the famous Rice Process—basis of the unique quality of Interior Barreled Sunlight.

Whiter and with more hiding power than other outside paints. Outside Barreled Sunlight is also extremely free-flowing and easy to use. Durable and even-wearing, so that its surface is in good condition when repainting.

From the dealer's point of view Outside Barreled Sunlight is a new product with an old reputation. It steps right into a ready-made market. With very little effort it can be made to double the Barreled Sunlight turnover.

Like the interior product, it comes in white only—so a small initial investment is sufficient. And also like the interior product it is extremely easy to tint with oil colors.

Barreled Sunlight Flat Wall Finish

You'll get a new thrill when you sweep out your first brushful of Barreled Sunlight Flat Wall Finish! Such ease of flow is unbelievable. But there it is. You can get it with your own brush! It's this effortless "slip" that shows instantly how Barreled Sunlight Flat Wall Finish saves time on every job . . . cuts down your greatest expense . . . labor.

But don't overlook the tremendous yardage of this sensational new paint. Actual tests, made again and again, have shown that it has from 16% to 50% greater spreading power per gallon without loss of effective coverage. And on your next flat job, you can get equally amazing results. Try it and learn how "different" a flat finish can be. Made in pure White only and can be tinted to any desired shade with Colors in Oil.

Barreled Sunlight Eggshell Wall Finish

Some people do not like a dead flat finish, so here is a paint with all the fine qualities of the above product, but with an eggshell gloss finish. Same price as the Flat Wall Finish. Try it.

Barreled Sunlight Plaster Sealer

The lack of uniformity in plaster work demands a Sealer that will reduce to a minimum the difficulties which master painters are experiencing, such as free alkali and lime—porosity, suction, hot spots, and fire-cracks. Barreled Sunlight Plaster Sealer overcomes these conditions so far as any paint coating can.

It is an oil-varnish product. Its object is to seal plaster walls (new or old) so as to provide a uniform surface for finishing coats. It dries with a tough hardness, rather than a brittle hardness. Barreled Sunlight Plaster Sealer is pigmented to give it opacity and "tooth," is easy to apply, flowing very freely and leveling out readily, and will dry hard enough overnight to be recoated the following morning. Made in White only.

King Dry Stains

For many uses, a hot water stain or alcohol stain is preferred to other kinds. These stains are widely used by fixture and novelty manufacturers. They are very economical because one pound of dry stain produces two gallons to five gallons of stain, depending on the shade of color desired. Packed 1 lb. in tin cans with re-closable covers.

	Per Lb.

Dri-Brite Wax

A wonderful new liquid floor wax that needs no rubbing or polishing. Dri-Brite is perfectly simple to put on—you merely remove old wax and dirt, take a clean soft cloth, and apply Dri-Brite as though you were wiping up the floor. No need to rub it in at all. Wait 19 minutes and a high luster finish will appear—hard and wear-resisting. Dri-Brite is the best advertised and quickest selling wax on the market. Every dealer should stock it.

Roof Paints and Cements

Liberty Elastic Black Roof and Metal Paint

Composed of best materials known for Durability and Preservative qualities. These include Gilsonite Asphalt; also Decomposed Cedar Wood, which assure greater elasticity to withstand the expansion and contraction of metal surfaces. Will not crack or check in cold weather or run under excessive heat.

Restores the saturation in all makes of prepared or composition Roofing. Keeps it pliable and prevents further evaporation. On metal it resists the destructive elements of water, rust, acid and brine. Being heat resisting, it is desirable for Stacks, Hot water and steam Pipes, Boilers, and other warm surfaces. Used extensively around Ice Plants on metal surfaces to resist the deterioration caused by brine and ammonia.

Cleaning Preparations

King 100% Cleaner for Heavy Duty Cleaning

Painters will find that King 100% Cleaner is a wonder work-saver for cleaning surfaces that are to be painted. It quickly removes deep-seated dirt and grease, insuring a clean surface, necessary to a good paint job.

Housewives buy King 100% Cleaner for many uses in the household—washing overalls and work clothes, cleaning sinks and drain pipes, removing ground-in dirt on all surfaces. Will not injure the hands.

Janitors find constant use for King 100% Cleaner. Makes it easy to clean woodwork, walls, pipes, sinks and plumbing parts, drain pipes, etc.

Dealers will find King 100% Cleaner a ready, year-round seller. One user tells another. Professional painters and contractors, farmers, mechanics, janitors, housewives—all buy King 100% Cleaner and come back for more and more. It is a sure seller and a sure repeater.

King "Crystal Spray" Glass Cleaner

For the home—Window washing is the last frontier of drudgery for the modern housewife. It has been the only household task which has not been lightened and made easy by modern methods—until now! King "Crystal Spray" Glass Cleaner has come to the rescue. It removes all the hard work and messiness from this once disagreeable task. "Crystal Spray"

does away with pails, water, ammonia, powders, squeegees, chamois and hard work. It cleans and polishes in one operation. It saves you two-thirds of the time and two-thirds of the work.

For the auto—King "Crystal Spray" is the handiest method of cleaning windshields and auto windows. It removes traffic film, mud and insects in a jiffy and polishes the glass at the same time. Filling stations buy it in gallon bottles and use the pocket size 5 oz. bottles to service their customer's cars.

Dozens of uses—"Crystal Spray" cleans and polishes tile walls and porcelain fixtures without danger of scratching or dulling the surface. It polishes mirrors to a high brilliancy. It cleans pictures, book case doors, china closet doors, porcelain on stoves and glass lighting fixtures.

Painters' Savogran

A popular heavy-duty cleaner for cleaning up all kinds of surfaces before re-decorating. Very strong, only one tablespoonful to the gallon of hot water is needed. Could also be used as paint and varnish remover when mixed very strong. Put up in following sizes:

35-Lb. Pails. Per Lb.....\$0.26
5-Lb. Cans. Per Lb..... .34
1-Lb. Cans. Per Lb..... .38

Dic-A-Doo

"Lifts" the dirt without rubbing or scrubbing

Dic-A-Doo is packed as a dry powder. Simply add cold water to make its consistency like that of thin cream. Apply it with a brush to any surface to be cleaned. Then, wipe off with a wet sponge or a clean, wet cloth. The dirt is lifted and rolled off, leaving the surface spotlessly clean. Dic-A-Doo contains no abrasives. It cannot injure even the finest surfaces. It can be used with absolute safety on painted walls, linoleum, woodwork, tile, house exteriors, factory walls, marble—in fact, wherever you can use ordinary soap and water.

"Plastic Wood"

A remarkable scientific invention. Wood in a can, in the form of a paste that can be moulded in the hands and applied with a putty knife. Plastic Wood is a compound of the consistency of thick paste, which hardens to wood on exposure to air. After hardening, it has all the characteristics of wood, except grain, and can be sawed, planed, whittled, and turned in a lathe. It will hold screws and nails without splitting and can be varnished or painted as well as the best grade of wood.

Plastic Wood is not affected by moisture or climate. It is waterproof and oil-proof. It will not chip, crack, crumble nor splinter. Plastic Wood has great adhesive properties, it will stick to metal, wood or stone, and when properly applied cannot be separated from its base except by cutting.

To soften Plastic Wood and Plastic Wood White Waterproof Tile Cement use Plastic Wood Solvent.

Solder-X

A remarkable chemical compound of heretofore unknown adhesive qualities, combined with proofness against water, oil and gasoline. The formula has been so perfected that it meets the many requirements of every day use in the home, office, shop or factory.

Solder-X has the appearance of a paste solder. In the tube it is plastic and flows readily, yet upon being exposed to the air it assumes a metallic hardness and will thoroughly cement together all manner of materials, producing a joint that defies breakage. Solder-X requires no heat, acid, soldering iron or blow torch for its application.

Put up in handsome three color lithographed tubes, each tube in an attractive carton and each dozen cartons in a beautiful counter display box.

Per Dozen	\$4.00

Less quantity, add 3c to net prices.

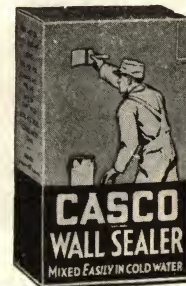

Casco Wall Sealer

Casco Wall Sealer is cold water soluble—does not have to be cooked, like glue. It cannot lump—but is dissolved like sugar. One pound makes from 1 to 1½ gallons liquid sealer. Does not spoil or sour.

Casco Wall Sealer can be applied to high moisture content walls; that is, walls containing as high as 30 per cent moisture. How soon after plastering application should be made depends on drying conditions, plaster mix, etc. If the surface of the plaster is dry to the touch, Casco Wall Sealer can be applied, and it will dry in two to twelve hours, according to conditions. Casco Wall Sealer will "take" evenly on all parts of a damp wall because it is not repelled by moisture.

Hot spots, free lime or wall areas having an excess of alkali are made harmless by additional coats of Casco Wall Sealer. The film becomes toughened and insoluble through contact with lime water.

1-lb. Pkgs. (24 to carton) Per Doz...\$8.88 Each \$0.80

Adhesium

This patented wall sizing has been called "the stickiest thing on earth." Adhesium is an exceptionally strong, condensed sizing especially adapted to hanging heavy wall papers, burlin, canvas, Lincrusta, and Sanitas Wall Coverings. It seals the plaster surfaces perfectly and enables the heaviest materials to stick permanently.

Per Gal.

King Show Card Colors

King Show Card Colors are noted for their quality. They are prepared ready for use and are free flowing, leaving no brush stroke showing, drying with a brilliant satiny mat finish; being opaque, they can be successfully applied one over the other, without disturbing the underlying color, similar to Tempera. These colors are suitable for use in schools as School Tempera colors. To dilute use clear water.

King Show Card Colors will not dry out or harden in the bottle.

Caswell's Electric Paper Trimmer

This Caswell Motor Driven Single Edge Trimmer is a real asset to any wall paper store. It is furnished with a powerful little motor wound for A. C. or D. C. current, 110 volt. Has a foot control to govern speed from very slow to very fast and is capable of trimming three double rolls of paper in one minute.

Both hands are free to handle paper and all the drudgery of handling a stock of paper is eliminated.

Specify A. C. or D. C. Motor.

For 18 to 22-inch stock, each.....\$111.25

Caswell's Double Edge Electric Trimmer similar to above. The left hand knife may be disconnected so only one edge can be trimmed.

For 18 to 22-inch stock, each.....\$155.60
For 18 to 30-inch stock, each..... 200.00

Caswell's Hand-Power Trimmer

This trimmer is substantially built. It is positive in action. No slipping or tearing of paper on the winding rod.

It is built to fit the attachments that are used in our Motor Driven Single Edge Trimmer and with an ordinary screw driver can be attached, should you wish later to have a motor driven trimmer.

Ladders

Hooker's Improved Extension Ladders

This is a strong and satisfactory ladder. It is made from seasoned Washington Fir, with selected hardwood rungs. Has a patent double roller attachment for raising and lowering easily, which also strengthens the ladder at its weakest place. We carry 30, 36 and 40-ft. sizes in two-section ladders always in stock.

Weight about 3 pounds to foot.

Sections	Each
24 ft. (2 sections 12 and 12).....	\$15.56
30 ft. (2 sections 16 and 14).....	20.00

“Dolesco” Stucco Brushes

No. 9001—Black O.K. Stucco Brush

A fine long stock, pure Chinese bristle brush for the Master Painter. Solid center construction permits use of brush even after it has worn down considerably. There is no open well in the center. The center row of bristles gives greater “spring” to the brush and enables the brush to do better work and last longer. Handle nicely finished in natural lacquer with black band at base. Setting is guaranteed to hold bristles in any paint material.

No.	Width	Length of Bristles	Weight Per Doz.	Per Doz.	Each
30	3½ in.	4¾ in.	7 lbs.....	\$52.20	\$4.50
35	4 in.	5½ in.	8¼ lbs.....	66.60	5.70
40	4½ in.	5½ in.	8½ lbs.....	74.00	6.30

No. 9000—Black Cabot Stucco Brush

A practical leather bound brush for applying paint on large surfaces. Finest quality long selected. Chinese bristles. Solid center construction assures better work and longer life. Patent composition setting—guaranteed to hold the bristles in any paint material. Finished in green with gold band at base. A wonderful value at these prices.

No.	Width	Length of Bristles	Weight Per Doz.	Per Doz.	Each
30	3½ in.	4¼ in.	6¼ lbs.....	\$42.20	\$3.60
35	4 in.	4½ in.	6½ lbs.....	53.40	4.60
40	4½ in.	4½ in.	7½ lbs.....	57.80	5.00

“Dolesco” Red Top Brushes

The “Red Top” insignia on each Dolesco Paint or Varnish Brush is a hall-mark of quality. It distinguishes the line and serves as a positive identification of a quality tool designed for applying quality materials.

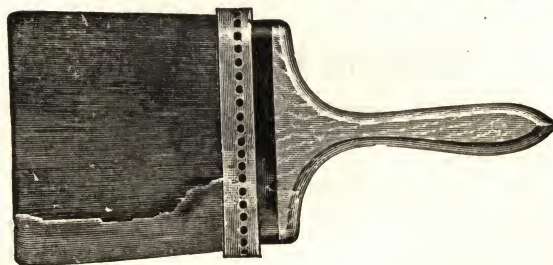

No. 9006—Wabash Stucco Brush

A practical leather bound tool for the practical man. Selected black Chinese bristles, securely set and leather bound. A good brush for general outdoor painting or wall work.

No.	Width	Length of Bristles	Weight Per Doz.	Per Doz.	Each

"Dolesco" Painter's Dusters

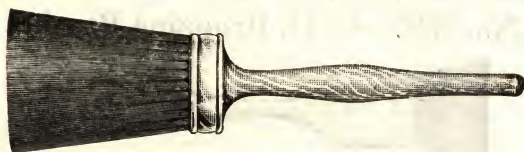

No. 9100—French Coach Dusters

An elegant duster for finest auto and carriage work as well as for nice cabinet work. All finest bristles in hard rubber set in metal plate. A brush that will give good service for an exceptionally long time. Natural one-piece wood handles.

Diameter	Length	Weight, Per Doz.	Per Doz.	Each
2¼ in.	4 in.	6 lbs.....	\$57.76	\$5.00

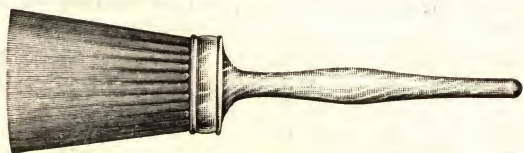

No. 9102—Packard Round Dusters

All selected black and gray bristles in hard rubber, a duster that will stand all kinds of wear and tear. Stained and varnished handles.

Diameter	Length	Weight, Per Doz.	Per Doz.	Each
2½ in.	4¼ in.	6 lbs.....	\$60.00	\$5.50

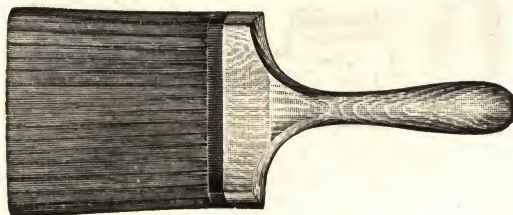

No. 9103—Reo Round Dusters

All good quality mixed stock. There is a wide demand for a duster of this kind at a reasonable price. You will find it a splendid seller. Fine value for retail purposes. Every brush stock should include the three sizes.

No.	Diameter	Length	Weight, Per Doz.	Per Doz.	Each
44	2½ in.	3 in.	3¾ lbs.....	\$16.00	\$1.50
66	2½ in.	3½ in.	5½ lbs.....	20.00	1.80
88	2¾ in.	4¼ in.	5½ lbs.....	23.34	2.00

No. 9105—Jackson Flat Dusters

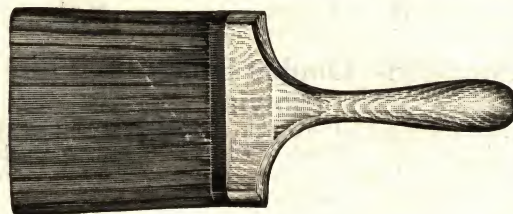

Many practical workmen now prefer the flat dusters for general work. It enables them to cover more surface and saves time. On plain or flat work, it is a handier tool than the round duster.

All good black bristles, set in vulcanized rubber in a metal plate which is screwed to the handle. A very popular duster.

Width	Length of Stock	Weight, Per Doz.	Per Doz.	Each
4 in.	4¼ in.	6 lbs.....	\$46.66	\$4.00

No. 9107—Taylor Flat Dusters

All gray Russian bristles. A good duster for general use on flat or plain surfaces. Same setting as our Jackson duster. Very good value for the money.

Width	Length of Stock	Weight, Per Doz.	Per Doz.	Each
4 in.	3¾ in.	4½ lbs.....	\$60.00	\$5.50

No. 9108—Monroe Flat Duster

Retails at \$1.00 each

Just what you need. A good duster to retail at a popular price. One-piece polished handle, good mixed stock.

Width	Length of Stock	Weight, Per Doz.	Per Doz.	Each
4 in.	3⅝ in.	4 lbs.....	\$17.78	\$1.50

No. 9109—Black Wing Flat Duster

A good mixed bristle duster for general work. Black bristle casing and gray mixed center set in cement. One piece handle stained yellow and varnished.

Width	Length	Weight, Per Doz.	Per Doz.	Each
4 in.	4 in.	5¼ lbs.....	\$31.12	\$2.70

Rubberset Glue Brushes

The Rubberset Glue Brushes are no experiment. They have now been in the market a sufficient number of years to thoroughly test their qualities. They have stood the most severe tests and have given greater satisfaction than any other Glue Brushes made.

Rubber Bound brushes can be used in hot glue for all purposes, and are especially adapted for work where a metal bound brush is objectionable.

No. 9190—Round Rubber Bound Glue Brushes

No.	Diameter	Length of Bristles	Weight Per Doz.	Per Doz.	Each
1	1¼ in.	2½ in.	2½ lbs.	\$26.66	\$2.30

Hooker's Wallpaper Merchandising Plan

PROFIT—The Ultimate Goal

Sound profits are vital to the continued success of your business. Hooker's Wallpaper Plan is designed with this one object in view—to insure a fair profit to the retail merchant. This is made possible by the following principles:

1. POPULAR RETAIL PRICES

The 1934 King Line consists of 100 papers to retail at popular prices, with necessary borders and ceilings. This assortment contains all the designs, colors and styles in popular demand. All papers printed with fast colors.

2. SATISFACTORY PROFIT MARGIN

Our wholesale bundle prices insure a satisfactory margin of profit. Our prices on the 1934 line cannot be beat.

3. MINIMUM INVENTORY AND FREQUENT TURNOVER

It is not necessary to stock the full line of 100 papers. We suggest that the dealer select 25, 35 or 50 papers for stock and display. All papers graded at 12c retail or less can be purchased in bundles of 50 rolls. Papers graded over 12c can be purchased in bundles of 30 or 50 rolls. With each stock we supply a sturdy floor stand (30 inch) sample book of our full line. You can order room lots of the papers you do not stock at the following discounts:

Papers listed at 12c or less—33⅓ and 10%

Papers listed over 12c less—33⅓ and 20%

In this way you have the advantage of offering our complete line without the expense of carrying a complete stock.

4. LOSS ON CARRY-OVER STOCK

In the past, this item has operated strongly against net profits in the retail Wallpaper business. Our plan of carrying a small stock tends to eliminate this loss. We advise dealers to dispose of all carry-overs at the beginning of each year by inventorying them at one-half cost and by reducing the resale prices in proportion. This gives you some real bargains to feature and turns the excess stock into money at a profit. This enables you to keep your stock always clean, fresh and up-to-date.

5. SERVICE

Our warehouse stocks conveniently located in Chicago, Peoria, Davenport, Kalamazoo and Muncie, carry the complete line and can render prompt service on papers which the Dealer does not carry in stock.

On the following page we illustrate a few numbers taken from our 1934 line. A sample book of the 100 patterns will be sent you on request

Plate Glass

Handling a Big Fellow

The photograph shows how easily, quickly, and economically we can handle a monster plate. Two men, thanks to this modern method, now do the work which formerly required six or eight, and the glass is out of the rack and on to the wagon or in the packing case in almost less time than it takes to tell the story.

This is only one phase of the service the Plate Glass Department gives our friends. Our stock of all sizes, large and small, is ample to take care of your demands; our warehouse is conveniently located for truck or railroad deliveries, and our organization is yours to the last man.

A Century of Progress

"The Sky-Ride—Glass and Glazing by Hooker

In 1933 the world was invited to Chicago to witness a marvelous Exposition depicting the progress and advance of mankind during the 100 years since Chicago's incorporation as a city.

The Hooker Organization is justly proud of its part in building and maintaining this great "Century of Progress" Exposition. Our Glazing Department handled some of the most interesting and difficult installations, such as the "Sky-Ride" and "The Belgian Village."

King Paint and Varnish Products were used in a great many buildings and exhibits and did faithful service throughout the season in protecting and beautifying the exhibits.

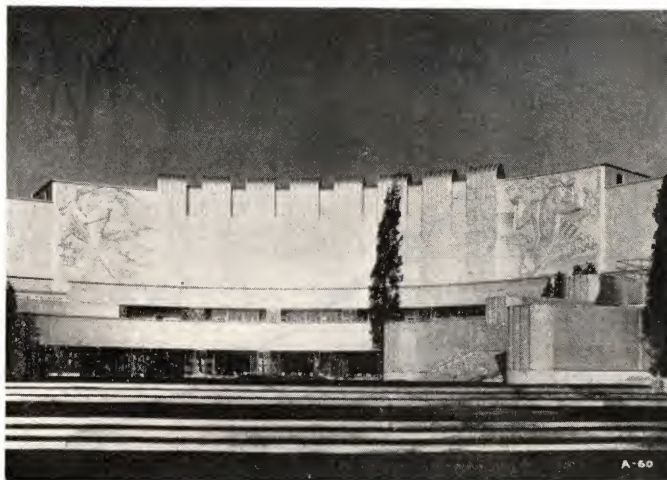

Come to Chicago in 1934

"A Century of Progress" Exposition will be repeated in 1934 for the benefit of millions who were unable to attend. There will be many new buildings, and many new exhibits will be shown for the first time—and the most interesting and most popular features will be repeated. The Hooker Organization will have a full part in the reconstruction of the Exposition.

We cordially invite our out-of-town customers to visit our offices and factories while in Chicago attending the World's Fair.

Partial list of Buildings and Exhibits in which Hooker's Paint Products, Mirrors, or Glass have been used:

The Administration Bldg.	The Hub Building
The Sky-Ride	The General Cigars Bldg.
The Electrical Group	Eitel's Rotisserie
The Dairy Bldg.	Twelfth Street Entrance
The Agricultural Bldg.	North Midway Luncheonette Bldg.
The General Exhibits Bldg.	The Stran Steel House
The Hall of Science	"The World of a Million Years Ago"
Home Planning Hall	"Crown Food" Restaurant
The Federal Bldg.	The Doughnut Shop
The States Group	Ticket Offices and Turnstiles
The Belgian Village	The Official Service Bldgs.
The Air Show	
Casino de Alex Restaurant	
The Nash Bldg.

Auto Glass

AUTO PLATE GLASS

The Automobile Industry offers a vast market for glass entirely independent of the Building Industry. The business of replacing broken auto glass is a lucrative one and offers increasing opportunity to the progressive glass dealer.

Plate glass is ideal for auto glazing because of its clarity and freedom from defects which impair or distort the vision. Hooker's Auto Plate is especially selected for this purpose and handled in all suitable sizes. We carry an adequate stock in Chicago and our branch warehouses, and are fully equipped to offer you the glass alone, or completely prepared for installation in any make of car. Prices on request.

HERCULES—The Wonder Glass

Plate Glass Strength for a Sheet Glass Price

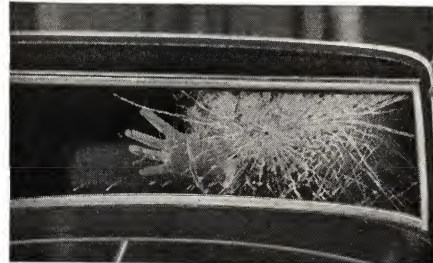

For those who cannot afford the benefits of plate glass in their cars, we offer a very satisfactory substitute in "Hercules" Glass. This glass is made in large sheets $\frac{3}{16}$ " thick, weighing 39 oz. per square foot. It is perfectly clear, but not polished and waveless like plate glass. "Hercules" Glass has great tensile strength, and will not break easily from vibration. We carry an adequate stock of "Hercules" at all warehouses, in sheets and cut sizes. Prices on request.

L-O-F SAFETY GLASS

Libbey-Owens-Ford Safety Glass is a perfected product. It is made of two pieces of glass permanently bonded together with a pyroxylin plastic. All edges are sealed with a special weatherproofing compound which protects the glass against discoloration or separation. Libbey-Owens-Ford Safety Glass is standard equipment on America's finest cars including Lincoln, Cadillac and Packard. We carry an adequate stock of Libbey-Owens-Ford Safety Glass at all warehouses and are equipped to give prompt service.

How Window Glass is Made

By Libbey-Owens-Ford Flat Drawn Process

THE Libbey-Owens-Ford flat drawn process, a development and improvement of the Colburn process, revolutionized the manufacture of glass when it was introduced some fifteen years ago. Although, since that time, other methods have been developed for producing high quality window glass, none of them produces a more lasting brilliance of finish than is to be found in L. O. F. glass.

L. O. F. Window Glass is comparatively non-brittle. is exceptionally easy to cut, and is free from internal strain. These advantages are gained by slow annealing in long ovens or lehrs (five or six times longer than those used in other processes).

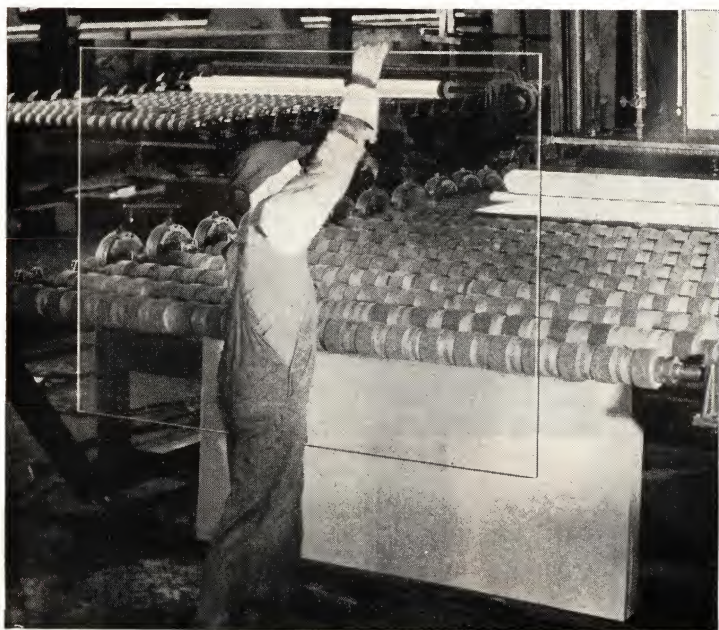

Pouring Raw Material Into Furnace

First the scientifically mixed batch is poured from the chute into a heating tank or melting furnace. Here the silica, soda ash, limestone, charcoal, cullet, and arsenic which make up the batch, are melted. The molten mass then flows into a refining chamber from which it is elevated or drawn a few inches and then passes over a bending roll, still in a semi-molten state.

As the glass is raised from the fire chamber the natural fire finish is applied to both sides of the sheet. Leaving the bending roll slowly hardening, the glass is moved horizontally, perfectly flat at all times, into the long annealing oven or lehr more than 200 feet in length. The gradual annealing under a scientifically regulated and steadily diminishing temperature tempers the glass making it free from internal strain and giving it that uniform strength and freedom from brittleness which makes L. O. F. glass so easy to cut.

Emerging from the lehr the finished sheet moves still in a horizontal position, onto a cutting table for its first inspection and cutting. Further inspection, grading and cutting to standard sizes follow.

Taking Glass Sheets from Lehr

Window Glass

We are headquarters for Window Glass in the Middle West. Our warehouses in Chicago and Peoria, Ill., Davenport, Ia., Muncie, Ind., and Kalamazoo, Mich., always carry a complete and adequate stock of flat-drawn Window Glass in the best brands. Let us figure on your requirements whether they be one light or a thousand boxes. Write for current glass discount sheet.

GREENHOUSE GLASS

Greenhouse Glass is especially selected for freedom from bubbles or "seeds" which might act as lenses and focus the sun's rays upon the plants in a harmful manner.

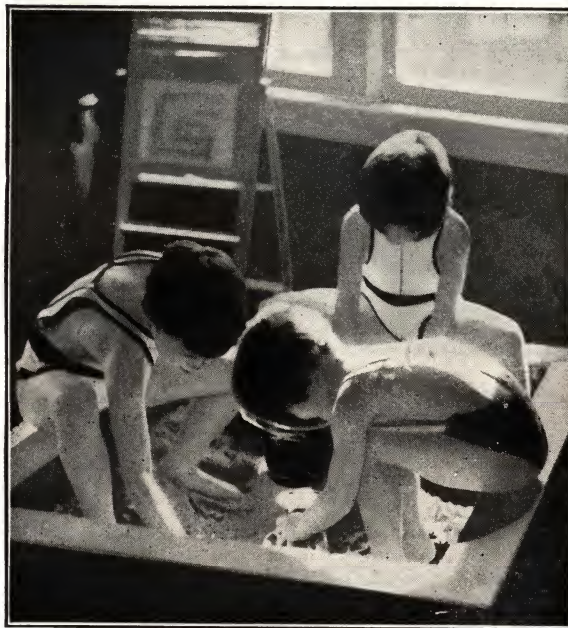

We carry a large stock of special "Greenhouse Quality" Glass on hand at all times and are prepared to render emergency service when needed. Let us quote you.

A Part of Our Immense Stock

VITA GLASS

(The Health Window Glass)

VITA Glass, as you know, is a glass that brings the out-of-doors health indoors. It looks just like ordinary window glass, but unlike window glass it will transmit the vital ultra-violet rays of the sun, and so makes each window a source of health. Sunshine through ordinary window or plate glass means only heat and light. Sunshine through VITA Glass is outdoor sunshine indoors—it means light, heat and health. VITA Glass is now made in America, and we are able to offer it at greatly reduced prices.

AGRICULTURAL VITA GLASS

Agricultural Vita Glass is offered for use in glazing hot beds, poultry houses and farm buildings. Experience demonstrates that its use increases egg productions, prevents rickets, speeds growth and heightens hatch-ability of eggs. It is useful for hogs as they also are subject to leg weakness, and makes unnecessary the use of costly Vitamin rich foods during the winter.

Rough Glass

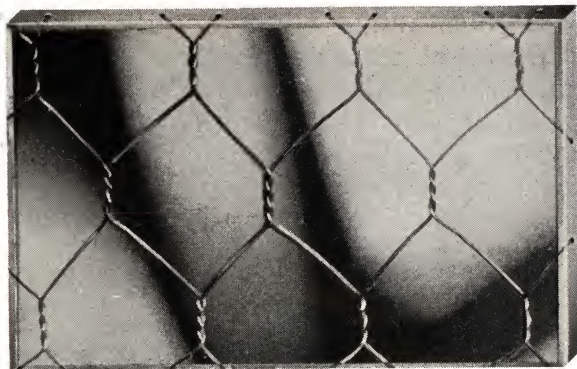

Rough Wire Glass

Thickness $\frac{1}{4}$ "—Maximum Width 48"

Officially approved by Underwriters' Laboratories, Inc., under Fire Retardant Number R-2129.

There is no similar product on the market. Because of its partial transparency it is ideal for use in openings not requiring the unobstructed vision afforded by Polished Wire glass. There is practically no pattern to diffuse the light but the volume transmitted is high because the metal is of such good quality. Its smooth surfaces make it comparable with clear glass in cleanliness.

Especially recommended for windows and skylights of factories and other industrial buildings. Prices on request.

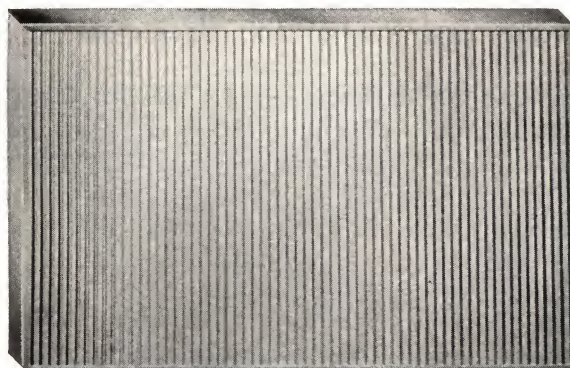

Polished Wire Glass

Thickness $\frac{1}{4}$ "

Officially approved by Underwriters' Laboratories, Inc., under Fire Retardant Number R-2129.

Architects and owners who have objected to the usual disfigurement of Polished Wire glass by clusters of bubbles on the wire mesh will appreciate the superb quality of this product.

The bright steel wire is completely free from grouped bubbles and discoloration. It is firmly imbedded in genuine plate glass midway between the two brilliantly polished surfaces. Prices on request.

Ribbed

Thickness $\frac{1}{8}$ " and $\frac{3}{8}$ "—Maximum Width 48"

Ribbed glass is for industrial glazing only. It diffuses light satisfactorily but when exposed in areas where dirt and grease are prevalent its cleanliness is rather difficult to maintain. Unless special conditions warrant its use, we suggest INDUSTREX, LUMINEX or HAMMERED as preferable patterns for factory windows, skylights and partitions. Prices on request.

Ribbed Wire Glass, Fire Retardant R-2129, is made $\frac{1}{4}$ " thick, in widths up to 48". Prices on request.

Florex

Thickness $\frac{1}{8}$ "—Maximum width 48".

This pattern is popular for interior glazing because of its beauty and effective distribution of light. Its brilliance is largely due to the quality of the glass as the imprinting is based on the principle of avoiding sharp grooves and corners as far as possible.

Rough Glass

New Designs

The following designs are the newest and most attractive patterns in rough glass. We carry them in stock in $\frac{1}{8}$ ", $\frac{3}{16}$ " and $\frac{1}{4}$ " thicknesses, up to 48" wide.

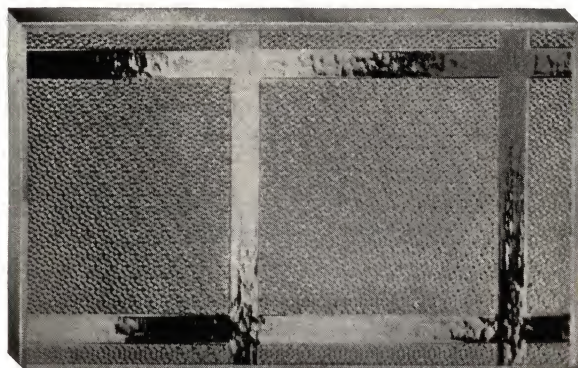

Hammered

Thicknesses $\frac{1}{8}$ " and $\frac{1}{4}$ "—Maximum Width 48"

This glass differs from all other patterns of the same name both in appearance and scope of usefulness. The contiguous lenses forming the pattern distribute the light passing through the glass and accentuate the luster of the metal. Consequently, this Hammered glass offers beauty and cleanliness in addition to mechanical efficiency. It is used for general industrial glazing in either exterior or interior locations.

Hammered Wire Glass

Fire Retardant R-2129, is made $\frac{1}{4}$ " thick, in widths up to 48".

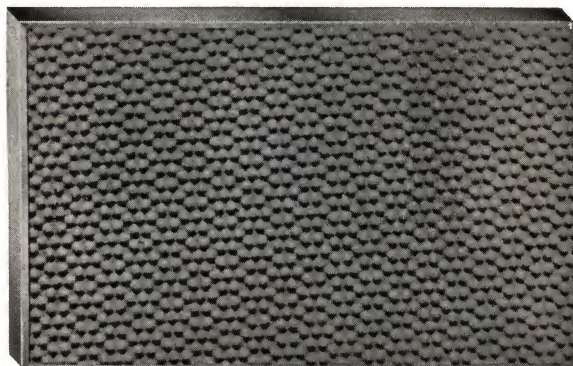

Transex

Thickness $\frac{3}{32}$ "—Maximum Width 48"

Transex (for store front transoms) is a solid sheet of glass made to resemble separate tiles set in metal. The $3\frac{1}{4}$ " squares are the Diffusex pattern and the $\frac{3}{8}$ " lines are plain, a combination of pleasing appearance and practical value.

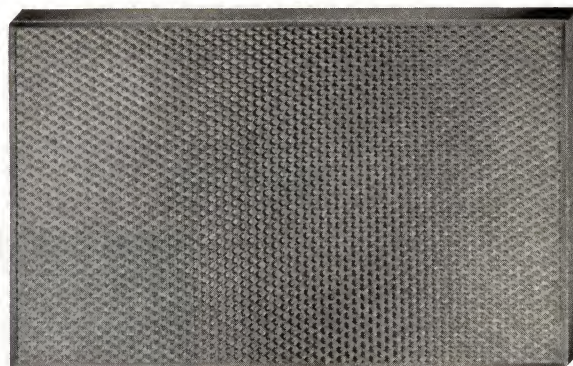

It is weather-proof because there are no cemented joints to weaken under the vibration of wind and rain storms and the division lines are not elevated above the Diffusex background. A firm and leakage-proof contact is thus insured between sash and glass at all points.

Diffusex

$\frac{1}{8}$ " and $\frac{3}{16}$ " Thicknesses, Width to 48"

A new design of modest beauty and highest quality. Transmits a soft light uniformly by means of tiny lenses which do not collect dirt rapidly. The lenses are but slightly elevated and there are no angular lines to make cleaning difficult. Used primarily for interior partitions, doors and transoms, but equally effective in any location where adequate light diffusion is desired.

Industrex

$\frac{1}{8}$ " and $\frac{3}{16}$ " Thicknesses, Width to 48"

A highly practical light diffusing glass for industrial buildings. The small lens-shaped figures are compactly arranged to provide uniform refraction and overcome glare.

Luminex

$\frac{1}{8}$ " and $\frac{3}{16}$ " Thicknesses, Width to 48"

Luminex—the "smooth" glass—is especially recommended for industrial glazing when the cost of keeping glass clean is an important factor and only medium distribution of light is essential. It is almost transparent and as the pattern is of extremely fine texture it can be glazed and cleaned like clear glass.

Photometric measurements made by the government laboratory showed that a greater volume of light passed through Luminex than through clear glass of corresponding thickness. Store front transoms, furniture tops and storm shields for costly leaded windows are popular uses. Prices on request.

V-Mitre or Ribbon-Mitre Designs for Building Glass

Ribbon Design No. 501

Ribbon-Mitre Cut Glass is absolutely new and allows almost unlimited scope in the carrying out of individual decorative ideas.

It has many advantages over art, leaded, acid etched, sand-blasted and various other kinds of decorated glass, and presents an unmistakable air of Quality and Refinement.

Mirrors, Plate, Window, and Ornamental glass can all be used in this work and to advantage in almost every conceivable place where glass is used.

Individual—Practical—Inexpensive

The Ribbon-Mitre lines are especially attractive in the decoration of glass used in Windows, French Doors, Sun Parlors, and many other places. Unusual beauty and distinction are attained, and the cut lines do not in any way interfere with the vision—as easy to wash and clean as plate glass. Then, too, with Ribbon-Mitre cut glass there is no upkeep expense. The complete elimination of wood or lead muntins that rattle and leak, that require painting and additional glazing, are factors which the investment builder should consider.

Send for folder showing many attractive designs.

MIRRORS

Hooker Mirrors have earned an enviable reputation for quality and fineness due to our extreme care in selection of glass and materials, and our insistence on careful workmanship.

We operate one of the most complete glass-working shops in the Middle West, equipped with the latest devices for grinding, beveling, wheel-cutting, polishing, and silvering glass. Hooker Mirrors are silvered by the most approved method and finished with a special protective coating developed by our own paint laboratory. This new process thoroughly waterproofs and protects the silvering and greatly increases the life and brilliance of the mirror.

PICTURES

We carry a beautiful line of framed pictures for the furniture trade. Send for illustrated folder describing our "Process Pictures," Etchings and Prints.

Framed Mirrors

Nu-Process

Moisture-Proof

Hooker's Famous Mirrors are well known throughout the country for beauty of design and excellence of workmanship. We make a complete line of decorative mirrors of all kinds, styles, periods, and designs, both framed and unframed.

Our Display Room at the American Furniture Mart (Space 866) is open all year long to the Retail Furniture Trade.

Send for literature describing the latest additions to our Framed Mirror Line.

HOLLOW METAL STORE FRONTS

Modern Display Windows Sell More Goods

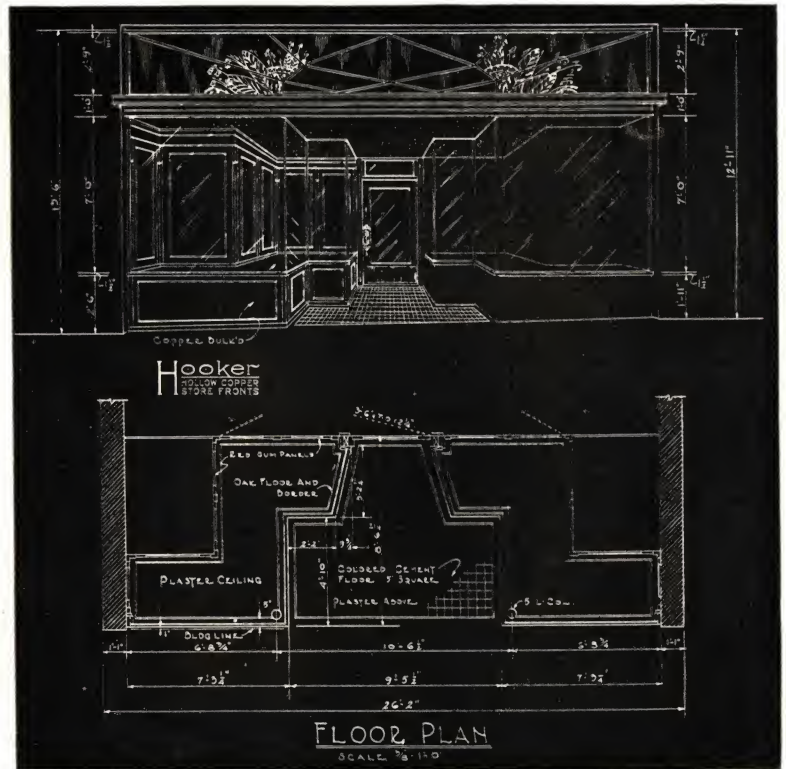

PRESENT-DAY merchandising methods lay great stress on the cash value of proper window displays. Many merchants estimate the rental value of their windows as 50% of their entire rental. This being true, can any merchant afford an inefficient, unattractive, and obsolete store front? No. A modern, well-designed store front is the best investment he can make. Building owners find that such a front is their greatest aid in securing successful tenants.

A store front must, primarily, be attractive. It must be properly designed to effectively display the merchandise. It must assist the merchant in making beautiful and attractive displays of his goods. It must be attractive in itself. Hooker Hollow Metal Store Fronts in copper or ornamented Bronze are beautiful and add to the effectiveness of any display.

Beauty Plus Strength

A store front must be strong as well as beautiful, designed properly to protect the contents of the window and to minimize the glass breakage. Hooker Hollow Metal Store Fronts include many improved features of mechanical design and construction including steel re-enforcement of corner and division bars.

Strength was created where strength is most essential and to this was added the independent, self-supporting feature of the sash face, which, when installed with the indirect screw, removes entirely all danger of subjecting the glass to varying and excessive degrees of pressure.

Hooker Construction is a complete system embodying only the best of proved methods and principles and its installation will represent a sound and permanent investment.

The Finest Farms In Indiana

Just outside of Kentland, Indiana, in one of America's finest soil areas, lies the old Kent Estate consisting of 2,700 acres, divided into seven farmsteads named—Roimanor, Roicrest, Roishire, Roidale, Roiworth, Roifair and Roiview. Each farm is a complete unit in itself with a full complement of buildings.

The present owner, Mr. L. H. Dorsey, President of the Chicago Portrait Company, found these buildings in dire need of protection. Mr. Dorsey realizes that the highest quality always produces the lowest ultimate cost and gives the best satisfaction. He desired the finest possible white job on these buildings and selected KING ALUMINUM WOOD PRIMER and KING SUPER WHITE for the farm buildings and two coats of KING SUPER WHITE for the farm houses. Mr. Dorsey says, "The whole community admires their appearance which I am fully convinced is due to the fine quality of the HOOKER GLASS & PAINT MFG. CO. products."
